COMP3320 Introduction to OpenGL

Alex Biddulph

The University of Newcastle, Australia

Semester 2, 2021

Introduction to OpenGL

- This lecture series aims at providing a brief overview of OpenGL and associated libraries
- A series of C++ code examples are also provided
- The code example try to provide modern C++ wrappers around the C libraries in order to simplify the code

Libraries

The following libraries are used or have a wrapper in the code examples

Library	Description
☞ OpenGL	For all of our 3D graphics needs

Libraries

The following libraries are used or have a wrapper in the code examples

Library	Description
☞ OpenGL	For all of our 3D graphics needs
☞ GLFW	Window and input management

Libraries

The following libraries are used or have a wrapper in the code examples

Library	Description
☞ OpenGL	For all of our 3D graphics needs
☞ GLFW	Window and input management
☞ GLAD	OS-specific library abstraction for OpenGL functions

Libraries

The following libraries are used or have a wrapper in the code examples

Library	Description
☞ OpenGL	For all of our 3D graphics needs
☞ GLFW	Window and input management
☞ GLAD	OS-specific library abstraction for OpenGL functions
☞ GLM	OpenGL mathematics library

Libraries

The following libraries are used or have a wrapper in the code examples

Library	Description
☞ OpenGL	For all of our 3D graphics needs
☞ GLFW	Window and input management
☞ GLAD	OS-specific library abstraction for OpenGL functions
☞ GLM	OpenGL mathematics library
☞ SOIL	For loading texture files

Libraries

The following libraries are used or have a wrapper in the code examples

Library	Description
☞ OpenGL	For all of our 3D graphics needs
☞ GLFW	Window and input management
☞ GLAD	OS-specific library abstraction for OpenGL functions
☞ GLM	OpenGL mathematics library
☞ SOIL	For loading texture files
☞ Assimp	For loading 3D models

Libraries

The following libraries are used or have a wrapper in the code examples

Library	Description
☞ OpenGL	For all of our 3D graphics needs
☞ GLFW	Window and input management
☞ GLAD	OS-specific library abstraction for OpenGL functions
☞ GLM	OpenGL mathematics library
☞ SOIL	For loading texture files
☞ Assimp	For loading 3D models
☞ OpenAL	For all of our 3D audio needs

Libraries

The following libraries are used or have a wrapper in the code examples

Library	Description
☞ OpenGL	For all of our 3D graphics needs
☞ GLFW	Window and input management
☞ GLAD	OS-specific library abstraction for OpenGL functions
☞ GLM	OpenGL mathematics library
☞ SOIL	For loading texture files
☞ Assimp	For loading 3D models
☞ OpenAL	For all of our 3D audio needs
☞ libsndfile	For loading audio files

Libraries

The following libraries are used or have a wrapper in the code examples

Library	Description
☞ OpenGL	For all of our 3D graphics needs
☞ GLFW	Window and input management
☞ GLAD	OS-specific library abstraction for OpenGL functions
☞ GLM	OpenGL mathematics library
☞ SOIL	For loading texture files
☞ Assimp	For loading 3D models
☞ OpenAL	For all of our 3D audio needs
☞ libsndfile	For loading audio files

Github Repository

All code examples can be found at the following ☞ Github repository
